Summary

Senior Computer Science student with hands-on experience in .NET full-stack development and modern front-end technologies. Skilled in building scalable web applications, implementing backend logic, and creating interactive user interfaces using React. Experienced in integrating AI features into applications, with a solid foundation in networking and cybersecurity. Eager to contribute to real-world projects and continuously improve technical skills.

Education

Bachelor of Science in Computer Science
Nile University, Egypt | 2021 – 2026

Experience

NET Full Stack Development – November 2025
- Built web applications using ASP.NET Core and SQL Server
- Developed RESTful APIs and handled backend logic

Cybersecurity Internship – Xpand MCS Academy, Cairo – August 2025
- Performed basic network analysis using Nmap and Wireshark
- Applied secure coding practices in backend development

CCNA (Cisco Certified Network Associate) – CLS Network Academy – 2024
- Learned networking fundamentals, routing, switching, and subnetting
- Configured routers and switches using Packet Tracer

Projects

Digital Twin in Breast Cancer
-Architected full-stack Digital Twin framework for breast cancer response prediction, integrating machine learning and Bayesian inference with a web-based CDSS
-Established robust backend-to-frontend API pipelines for real-time interaction, dynamic querying, and processing of longitudinal radiomic metrics.
-Designed interactive 3D visualization modules for complex medical imaging, enabling clinicians to inspect tumor volumetric and spatial dynamics.
-Bridged predictive analytics with clinical workflows translating computational simulations and 95% posterior credible intervals into actionable patient report cards.

Full Stack Inventory Management System
-Developed a full-stack inventory management web application using ASP.NET Core Web API, React, and TypeScript.
-Implemented CRUD operations for Products, Categories, Suppliers, Customers, Purchases, and Sales.
-Designed and integrated RESTful APIs using Entity Framework Core with automatic inventory updates and dashboard analytics.
- Built a responsive, component-based frontend using React, Axios, and Vite following a layered architecture and clean code principles.

Restaurant Management System
- Built a frontend application to simulate restaurant operations with dynamic user interaction
- Currently developing a full-stack version using ASP.NET Core and SQL Server
- Implementing backend APIs and database design for scalable system functionality

Certifications

- Cisco Certified Network Associate (CCNA)
- NET Full Stack Development
- React 19 – Coursera

Skills

Technical Skills

Backend Development: C#, ASP.NET Core
Frontend Development: React, JavaScript, HTML, CSS , TypeScript
Database: SQL Server
Concepts: REST APIs, State Management
Tools: Git, GitHub
Other: AI Integration, Basic Networking

Soft Skills

Communication, Problem Solving, Teamwork, Adaptability, Attention to Detail

Languages

- Arabic (Native)
- English (Very Good)
